3	1 July 2026	Aligned the schedule with the Contoso Service Desk case-study assessment.	Dr. Alfred Ang
4	20 July 2026	Major content expansion: course restructured to follow the DMAIC roadmap end to end; Lean Six Sigma concepts imported from the reference trainer deck and the CSSC body of knowledge and explained visually; 4 elective labs added (Affinity/Kano, VSM/Takt, Solution Matrix/Benchmarking/FMEA, Descriptive Statistics/Implementation Plan) and Lab 4 (PDCA charter) reclassified as elective, giving 9 core and 5 elective labs; interactive problem-solving tools (5 Whys, Fishbone, collaborative Pareto, NovaSPC) integrated into the Analyze labs; slide references added to the schedule.	Dr. Alfred Ang
5	20 July 2026	Integrated the SIPOC & Process Map Builder (alfredang.github.io/sipoc/) into Lab 3 and elective Lab 12, with a tool walkthrough added to the Define phase and the online toolkit slide updated to list all five tools.	Dr. Alfred Ang
6	20 July 2026	Fixed clipped headings: slide titles now auto-fit to a single line so long lab titles	Dr. Alfred Ang

		can no longer overprint the LAB/ELECTIVE chips beneath them.	
7	20 July 2026	Table of contents restored to a live, updatable Word field (previously flattened to static text), so it refreshes on open or F9 while still rendering correctly in the distributed PDF.	Dr. Alfred Ang

Learning Outcomes

On completion of this course, learners will be able to:

- LO1: Define a project and establish the scope of work using Six Sigma's Define, Measure and Analyse phases.
- LO2: Apply Lean and Six Sigma concepts — value, waste, defects and variation — to a work process.
- LO3: Map a process using SIPOC, process maps and value stream maps to expose handoffs and waste.
- LO4: Collect and analyse process data using check sheets, Pareto charts, run charts and basic metrics.
- LO5: Identify root causes using 5 Whys, Fishbone analysis and evidence-based prioritisation.
- LO6: Recommend improvement and control actions to sustain gains, and prepare for certification.

Assessment

- Written Assessment (WA) — Short-Answer Questions (SAQ), 60 minutes, open book.
- Case Study (CS) — applied Lean Six Sigma tasks, 90 minutes, open book.
- Format: Open Book — course slides, Learner Guide and approved materials only.
- Final assessment is conducted on Day 2 from 4:00 pm.
- A minimum of 75% attendance is required to be eligible for assessment and funding.
