Course Overview

This 2-day course prepares learners to support Lean Six Sigma Yellow Belt improvement work. Using a Contoso Service Desk case study, learners build a practical improvement package covering customer value, waste, SIPOC, PDCA, DMAIC Define, measurement, analysis, root cause, countermeasures, control planning, A3 handover and certification readiness.

Learning Outcomes

Outcome	Learner will be able to
LO1	Explain the Yellow Belt role and certification readiness expectations.
LO2	Translate voice of customer into CTQ requirements and identify waste.
LO3	Build SIPOC and process maps that expose handoffs and delay points.
LO4	Use PDCA and DMAIC Define tools to frame a small improvement project.
LO5	Plan data collection with KPIs, check sheets and basic metrics.
LO6	Use Pareto, run charts, variation, yield, DPU and DPMO for basic analysis.
LO7	Support root cause analysis and select evidence-based countermeasures.

LO8	Prepare control plan, A3 handover and certification readiness outputs.
